01

Value Conversion Review

A practical decision surface for moving a Consulting AI initiative from enthusiasm to an evidence-backed portfolio decision.

CONDITION	QUESTION LEADERSHIP MUST ANSWER	EVIDENCE
Work redesigned	What changes in the actual consulting workflow, handoffs, knowledge access, exceptions, and review?	Current/future workflow; user observation; exception map; quality criteria
Economics improved	Which economic mechanism changes—quality, capacity, speed, pricing, leverage, utilization, risk, or growth?	Baseline; unit of work; cost-to-serve; capacity; pricing hypothesis; margin implications
Judgment protected	Where must professional accountability, confidentiality, source trace, and human review remain explicit?	Authority map; control points; data boundaries; evaluation; escalation; audit trail
Adoption sustained	What makes the new behavior easier, relevant, reinforced, and locally owned?	Role expectations; workflow placement; manager coaching; repeat use; confidence; support burden
Decision rule	A technically feasible use case is not yet a consulting priority. Scale requires a credible positive case across all four conditions.
