Executive profile

Operator-technologist with 20+ years connecting complex technology, operating priorities, cross-functional teams, and measurable execution. Builds the mechanisms that move AI from possibility to adopted work: opportunity framing, workflow redesign, business cases, technical requests, governance, human review, evaluation, enablement, and portfolio discipline.

Selected leadership experience**Vape-Jet**

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connects factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Operates in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

Additional leadership experience

Compunetics

- Progressed through R&D program management, production management, strategic acquisition, operations management, and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls; collaborated with DoD, CERN, Intel, and AMD.
- Published industry articles, delivered technical talks, and participated in the HyperTransport Consortium.

Cardinal Building Products

- Built the company's first remote regional operation and modernized distributed customer, CRM, commercial, fulfillment, logistics, digital-marketing, and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

ZeusVu

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence; designed medical delivery and chain-of-custody concepts.

Enviro Social Capital

Co-founded and led a public-private impact initiative; helped shape and evaluate a \$200 million Social Impact Bond feasibility concept for Pittsburgh green-infrastructure improvement.

IEEE

Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing, and emerging technology.

Representative applied work

Business-value framing, readiness scoring, milestone roadmaps, and role-based work systems.
Structured context, retrieval, human authority, exception handling, evaluation, and governance patterns.
ERP, CRM, work management, collaboration, telemetry, dashboards, standard work, and escalation.
Computer vision, aerial inventory, geolocation, medical delivery, and chain-of-custody concepts.

Education

University of Pittsburgh

Bachelor of Science Academic grounding in materials science and physical chemistry.

Selected credentials

- Google AI Essentials
- IBM Enterprise Design Thinking Practitioner
- Six Sigma Certification
- OSHA 10

Leadership signature

Makes complex work visible, challenges unsupported assumptions, establishes decision rights, and connects strategy to operating cadence.

Target contribution

Own the Consulting AI vision, activation agenda, prioritization, business requirements, and value-realization system while serving as a technically credible counterpart to enterprise platform teams. Additional leadership experience Compunetics Director of Operations and Engineering Management | 2000-2013 Progressed through R&D program management, production management, strategic acquisition, operations management, and director-level leadership. Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
